

FOR IMMEDIATE RELEASE
Efferent Labs at MedTech 2016

(BUFFALO, NY) September 16, 2016 – Efferent Labs, Inc. a developer of high value medical technology and devices is pleased to announce that its President & CEO, Bill Rader, will be a speaker/moderator for “Bridging the Start-up Gap” at the MedTech 2016 conference on 27 October, 2016 in Albany, NY.

Efferent will also be displaying at the “Tech Showplace” during the entire conference, which takes place starting on Monday the 26th of October. The showcase provides an opportunity to share emerging technologies, products and research programs with conference attendees from the bioscience and medical technology community.

Efferent Labs is an active member of the MedTech organization, which connects New York State’s Bio/Med industry through collaboration, education and advocacy.

About Efferent Labs:

Efferent Labs is a developer of high value medical diagnostic technology. **Efferent Labs’** proprietary technology is CytoComm™ Living Cell Biosensor platform that is used for in-vivo, real time monitoring of physiological variables that leverage the ability to use biological signaling and cellular response. **Efferent Labs** is based in Buffalo, NY and is a 2014 43North award winner.
